

All Heal Energy Treatment

This is a complete energy treatment in an essence combination. It is interactive and can be used for anything. You can put it directly in your mouth or in your water or any liquid or food.

Please do not touch the dropper to your mouth or anything else as it can contaminate the treatment with bacteria, fungus, viruses, etc. Rinse the dropper if you do touch to your anything before you put it back in the bottle to preserve its sterile nature.

It is wonderful for dropping into a meditative brain wave for actual meditation or before doing energy treatments as well. It is great for general relaxation, pain relief, and for increased energy and healing depending on what one needs at the time of taking it. Since this combination works just like an overall energy treatment you can set your intention for healing, manifesting or clarity on an issue.

This combination is alive and works for the Best Good and in alignment with one's intentions when taken. It is immediately relaxing and initiates a meditative Alpha brain wave just as happens in an energy treatment on the table or in deep meditation.

For immediate support or throughout the day

One sets the intention for use --state to yourself what you want to happen -- (example --I need more physical energy; or relieve and heal the cause of this pain or illness or I desire peace or clarity on a particular issue, etc.) and then take 1 to 5 drops at least 3 – 4 times a day—more if needed (trust your Guidance). You can also put the drops in your water, coffee, any drink or food. You can take this as often as you need throughout the day.

For a full healing treatment

You can take 10 -15 drops or more (trust your Guidance on amount) for a full treatment when you have at least 30 minutes before having to be active and alert or you can take it at bedtime.

State to yourself what you want to happen--(example --I need more physical energy; or relieve and heal the cause of this pain or illness or I desire peace or clarity on a particular issue, etc.) and then take it.

For sleep set the intention for a deep healing restful sleep and then take it. If you wake up in the middle of the night and have trouble falling back asleep you can take another dose to go back to sleep.
