** So glad we chose Theo!** My teenage daughter took drum lessons from Theo for about 4 years before she went off to college. He is an exceptional, enthusiastic, patient instructor who loves what he does and will work with students at their own pace. Teaching from beginning fundamentals to polished pro work, Theo is a professional drummer with years of band and session experience - check out his background on his website and his videos on YouTube. He taught my daughter how to read rhythms and patterns, and later let her choose the songs she wanted to learn (He would take the time to analyze and break down one of her current favorite songs and transcribe it on paper for her to practice at home). I would sit in on the lessons, learning so much about music and drums myself. He has a great studio and is fluent in Pro Tools and other software as well, offering us great advice on mixing and editing. Theo was open to any and all questions I had even though the lesson was for my daughter. My daughter learned so much from Theo about drumming - of course night and day from start to finish, and we revere the impact Theo has made on our lives. So glad we chose Theo!
